GENERAL INFORMATION

Turf Power is derived from earthworm castings in a controlled environment setting. **Turf Power** can improve soil and soilless mixes. Use **Turf Power** as part of a well-rounded turfgrass and ornamental plant fertility program.

DIRECTIONS FOR USE

Turf Power can be applied to all ornamental plants, trees, turf, lawns, landscape shrubs, and flowers.

Turf Application

Golf, Lawns, and Sports Turf

Apply **Turf Power** as a soil spray at 25 L/ha in 800 L of water (8 ounces per 1 000 ft² in 2 gallons) at 15 day intervals or 50 L/ha in 800 L of water (16 ounces per 1 000 ft² in 2 gallons) at 30 day intervals. For best results, **Turf Power** should be watered in immediately after application and requires season long application programs.

Horticultural Root Drench Application

Apply **Turf Power** at 80 mL/L of water (10 ounces per gallon) every three weeks or 24 mL/L of water (3 ounces per gallon) weekly throughout the growing season.

HAZARD STATEMENT(S)

The product is not classified as hazardous. No known significant effects or critical hazards.

PRECAUTIONARY STATEMENT(S)

Keep out of reach of children. Read label before use. In case of eye contact, flush eyes with water. If swallowed, give water or milk. If eye or skin irritation occurs or you feel unwell, get medical advice/attention.
