## APPLICATION RECOMMENDATIONS

For continually optimized pH and growing conditions, apply 250 kg/ha (220 pounds per acre) at least twice per growing season or as needed. Soil test recommendations should be used to determine liming needs.

- Mindestens zweimal pro Wachstumsperiode 250 kg/ha ausbringen.  
 Aplicar 250 kg/ha un mínimo de dos veces por temporada de crecimiento.  
 Appliquer 250 kg/ha au moins deux fois par saison de croissance.  
 Applicare 250 kg/ha almeno due volte per stagione di crescita.  
 Breng 250 kg/ha minimaal twee keer per groeiseizoen aan.  
 Aplicar 250 kg/ha no mínimo duas vezes por estação de crescimento.

To adjust pH, apply 500 kg/ha (435 pounds per acre). In most soils this will raise the soil pH up to one full point. Retest and if needed, reapply at the pH adjustment rate.

To be used only where there is a recognised need. Do not exceed the application rate.
