

The Aqua-Aid logo is displayed in a large, bold, green font with a white outline and a registered trademark symbol (®). It is centered in the upper half of the image, which shows a golf course with a green, sand traps, and pine trees under a clear blue sky.

Aqua-Aid®

15 TO 30 DAY PENETRANT

- Enhances infiltration and delivers uniform moisture distribution
- Reduces irrigation requirements, lowering maintenance costs
- Safe to use year-round with no risk of phytotoxicity

The Aqua-Aid logo is shown in a white, bold, sans-serif font, centered within a red oval shape. This oval is positioned at the bottom of the image, which is a solid red bar.

AQUA·AID

Aqua-Aid

15 to 30 Day Penetrant

Aqua-Aid is a liquid penetrant formulated with high-quality, cosmetic-grade non-ionic surfactants. Its unique water-based formulation modifies water surface tension to deliver a uniform soil moisture profile across a range of soil types. Applied throughout the growing season, **Aqua-Aid** can reduce the required amount of irrigation and rainwater, resulting in less hand watering, lower maintenance costs, and a healthier plant.

PRODUCT DETAILS

- **Reduced Water Tension:** modifies water surface tension to improve infiltration and create a uniform moisture profile across the soil.
- **Increased Nutrient Uptake:** improves the movement of water and nutrients through the soil profile, enhancing plant nutrition.
- **Salt Leaching:** helps to leach harmful salts from the root zone, maintaining a healthier growing environment.
- **Year-Round Application:** the water-based formulation carries no risk of phytotoxicity, making it safe to use at any time of year.
- **Tank Mix Compatible:** compatible with most tank sprays, integrating easily into existing maintenance programmes.
- **Cost-Effective Performance:** delivers proven results at low application rates, providing excellent value across golf, sports, and lawn turf situations.
- **Biodegradable Formulation:** a non-toxic, non-flammable, and biodegradable solution that is safe for turf, plant life, and the wider environment.

COMPOSITION

PFC 3B - Inorganic Soil Improver

Dry matter content: 7.5% by mass

Ingredient: Ethylene oxide-propylene oxide copolymers (CAS: 9003-11-6)

DIRECTIONS FOR USE

Golf, Sports and Lawn Turf

- For tank application, mix 6 to 13 L/ha. Apply two applications in the first month at a 15 day interval. Repeat at 6 to 13 L/ha at 30 day intervals throughout the growing season.
- For injection application, inject 3 to 10 L/ha. Apply two applications in the first month at 15 day intervals. Repeat at 3 to 5 L/ha at 30 day intervals throughout the growing season.
- Irrigate after each application to remove the surfactant from the plant surfaces.

Available in packaging of 20 L, 208 L and 1.000 L.
