TDR 150/250/350

Fieldscout Soil Moisture Meters

The Fieldscout **TDR 150/250/350** is a soil moisture meter that takes soil moisture readings at the press of a button. With variable rod length options, you can measure soil moisture at your ideal root zone. The Fieldscout **TDR 150/250/350** is the expanded and completely updated version of the **TDR 100/300**, it combines a compact display with an advanced soil moisture probe that is connected to each other via a 1.5 meter long cable. The **TDR 150/250/350** is made for convenient carrying. With new enhancements, the **TDR 150/250/350** provides significant improvements in performance and measurement accuracy for optimal soil conditions. The meters can be used in various applications, such as on sports fields and golf courses, horticulture, container and open ground areas, road construction and in public green areas.
