Aqua Grow
For a stronger root system and plant-vitality

AQUA-GROW is a liquid, non-phytotoxic product based on natural plant extracts. It stimulates the growth of new plant roots and strengthens the existing root system. Based on 100% natural plant-feeding substances, **AQUA-GROW** promotes overall crop growth, supports the propagation of beneficial micro-organisms, and ensures a more vital crop with improved soil life. Allowed in MPS & GLOBALG.A.P. MRL free according to our protocol, diluted 1:100.

PRODUCT DETAILS

- **Root development**: Stimulates root mass development and strengthens existing root systems
- **Soil life**: Improves soil microbial life and supports propagation of beneficial micro-organisms
- **Plant defence**: Strengthens the overall plant defence system
- **Resistance**: Delays formation of resistant strains
- **Vegetative cycle**: Beneficial throughout the complete vegetative cycle
- **Sustainability**: Environmentally friendly; all ingredients are biodegradable
- **Yield**: Improves qualitative and quantitative production characteristics
- **Certifications**: Allowed in MPS & GLOBAL G.A.P

COMPOSITION

Classification: Organic Soil Improver PFC3(A) — EU Regulation 2019/1009
Component: Saponin Liquid (CMC1) — virgin material substances and mixtures

Organic carbon (Corg): ..... 25.2% w/w

DIRECTIONS FOR USE

- The application rate is 20-60 L/ha, applied in at least 400 L water. AQUA-GROW needs to get well into the rootzone, hence a deep irrigation is required.
- Moderate stress levels: use 20 L/ha on a monthly basis.
- High stress levels: Use 60 L/ha monthly, distributed in 3 cycles evenly spread out within 1 month.

Available in packages of 10L.
