Liquid TS
New Generation of Organic Fertiliser

Liquid TS is an innovative liquid soil conditioner derived from carefully selected plant extracts (Camellia sinensis seeds). Designed to rejuvenate soil health, increase organic matter, and optimize plant performance, **Liquid TS** is suitable for all turfgrass areas, lawns, sports fields, gardens and landscapes. It can be used all year round. For best results, apply before rainfall or water in after application. For professional use only.

PRODUCT DETAILS

- **Root Development & Nutrient Uptake**: improves root mass and stimulates natural nutrient absorption, allowing plants to make optimal use of available nutrients while reducing leaching.
- **Stress Resistance**: increases plant tolerance to stress conditions and maintains plant count during dormant periods.
- **Faster Establishment**: encourages faster grow-in and establishment of new grass seedlings.
- **Soil Life & Microbial Activity**: acts as a biostimulant, stimulating beneficial microbial activity and increasing populations of soil organisms that enhance aeration and nutrient cycling.
- **Organic Matter & Water Retention**: increases organic matter in the soil, improving structure, fertility and water retention for long-term sustainability.
- **Universal Application**: suitable for all types of turf and soil; greens, fairways, tees, sports fields, lawns and gardens.

COMPOSITION

Classification: Organic Soil Improver PFC3(A) — EU Regulation 2019/1009
Ingredients: Plant extract-based, Camellia sinensis seeds CMC 2.
Plants, parts of plants and plant extracts.

Total Potassium (K2O):	1.32% w/w
Total Nitrogen (N):	0.29% w/w
Total Phosphate (P2O5):	0.07% w/w

DIRECTIONS FOR USE

- 100 L/Ha, evenly applied over the turf. Spray in as much water as possible: 400 – 800 L/Ha. For best results, apply before rainfall or water in with a minimum of 10 mm of water. Optimum results have been achieved when the soil is already saturated.

Available in packages of 20 L, 208 L and 1000 L.
