VitaPower-X
New generation of plant biostimulants

VitaPower-X is a liquid plant feed based on natural plant elements, antioxidants, plant hormones and citrus extracts. It prepares the plant for biotic stress and cell damage caused by an attack. The formula is centered around a blend of different citrus acid extracts, highly effective against a wide range of endo and ecto pests, pathogens, moulds and viruses. **VitaPower-X** reduces stress not by killing pathogens, but by stimulating them to move out of the area — so the plant is no longer under attack. Field trials have shown parasitic nematodes moving away from the plant's rhizosphere, increasing plant root system and health.

PRODUCT DETAILS

- **Defence system**: Boosts the plant's own defence system against an abiotic attack
- **Stress alleviation**: Alleviates symptoms of stress and cell damage caused by pest
- **Pest deterrence**: Does not kill pests but deters and discourages them from attacking the plant roots
- **Nematodes**: Field trials show parasitic nematodes moving away from the plant's rhizosphere
- **Flower bulb dipping**: Effective biological alternative in combination with 50% classic chemicals
- **Sustainability**: Environmentally friendly; all ingredients are biodegradable
- **Certifications**: Allowed in MPS & GLOBALG.A.P. MRL free according to our protocol, diluted 1:100.

COMPOSITION

Classification: Organic Soil Improver PFC3(A) — EU Regulation 2019/1009

Total Nitrogen (N):	1.0%
Available Phosphate (P_2O_5):	1.0%
Soluble Potash (K_2O):	1.0%
Citrus extracts:	15.0%
Inert ingredients:	82.0%

DIRECTIONS FOR USE

- Apply minimum 2 L/Ha in 600L water at weekly intervals. Can be used as plant (leaf) and soil bio stimulant. Shake well before use.
- Soil application: Wash in with 2–5mm irrigation directly after application (depending on soil type)
- Flower bulb dipping: In combination with 50% classic chemicals; for detailed advice, contact your distributor
- Spray tank compatibility: Do not combine with pesticides or fertilizers unless prior use has confirmed the combination is physically compatible, effective and non-injurious under local conditions
- Storage: Store in a dark, cool and frost-free place. Do not store below 0°C or above 40°C. Limited shelf life after opening.

Available in packaging of 1 L and 10 L.

Please contact your distributor for more information.
